Personal Statement

North Stradbroke Island

Hi, I'm **Luke Nathan Hayes**. I've recently returned to Australia after a year in India, where I pursued my dreams of developing cutting-edge artificial intelligence technologies. Despite some challenges and setbacks, my 4th visa in India has enriched my skills and broadened my understanding of A.I. and emerging markets. I am a versatile professional with a natural talent for picking up new skills and identifying opportunities wherever I am. I will always be a life-long learner, as a student, on-the-job trainee, self-directed researcher and futurist. If you're not using a variety of Generative Artificial Intelligences in your business, then you're likely falling quickly behind those who do. Meet with me for a discussion on how to use A.I. My work history is patchy as I have performed more jobs. Below is a representative sample.

Work Experience

Network: <https://linkedin.com/in/lukecatalyst/>

Skilled Construction Laborer & Forklift Driver

Yorke Consulting; Dates : 2022 September until Current

- McNab commercial & industrial sites, as well as Aldi Keperra refurb with Mainbrace.

 Island Vibe Music Festival, assistant to site manager, mentor program 2015/16, Minjerribah
 North Stradbroke Island / Minjerribah Historical Museum, Aural history transcription 2014

Life-Long Learning

Since the internet transformed with iPhone & iTunes University podcasts, YouTube video courses & Audible books, I'm always learning a new process, software or computer gadget. I foresaw the Cybersecurity/A.I./Democracy challenges & studied a Diploma of Game Design at Evocca (2015/16), a Cert 4 in Cyber Security TAFE (2022) & I've followed Artificial Intelligence development since 2010. I attend most Qld A.I. & Crypto/Web3 meetups if I'm not abroad.

Activities

I enjoy bodyboarding, tennis, squash, cricket, golf, live music, sci-fi and designing **Protopia**. I love to travel, and spent 18 months of 2018/19 overseas in India, Nepal, Thailand, Abu Dhabi UAE to explore, research, & volunteer + again in 2023/24. In 2020 I learned virtual reality photography, video, editing, gaming and google street view. Since ChatGPT I've had over 2 million words of conversation & code exchange, plus I've made 16 Custom GPT's.
